Staking With DC-VAULT

Liquidity creator on Dexswap

Secured Earning With Insurance  
project of CORE-SURE

Get airdrop & buy -sell NFT on NFT  
MARKET PLACE

Earn Interest On Lending  
With Crypto Assets

## WHAT IS DC-VAULT

DC –vault is a token staking platform of DEXCORE project , where people can stake their tokens for short time period to get max benefit up-to 250% APY

Stakes for 15 days

Stakes for 30 days

Stakes for 60 days

Stakes for 90 days

Stakes for 180 days

HOW IT FULLY WORK:

it will announce later  
after LISTING completed.

## WHAT IS DEX-SWAP

**DEXSWAP** is a multi-swap platform of **DEXCORE FINANCE** ....

where users can swap all kind of tokens in single platform using three major blockchains

such as:-

1. Ethereum blockchain Token : INSTANT SWAP using DC-ETH

2. Binance blockchain : BNB BLOCKCHAIN TOKEN SWAP using DC-BINANCE

3. Tron blockchain Token : SWAP using DC-TRX

## PROJECT INFO OF DEXSWAP

### DEX-SWAP

#### DC-TRX

User's can instant swap of Tron blockchain Token  
Liquidity creator provide on liquidity Pool on DC-TRX  
And can earn 80% of Revenue fee of DC-TRX IN Equal proportion  
Direct in form of TRX

#### DC-ETH

User's can instant swap of Ethereum blockchain Token  
Liquidity creator provide on liquidity Pool on DC-ETH  
And can earn 80% of Revenue fee of DC-ETH IN Equal proportion  
Direct in form of ETH

#### DC-BINANCE

User's can instant swap of Binance blockchain Token  
Liquidity creator provide on liquidity Pool on DC-Binance  
And can earn 80% of Revenue fee of DC-Binance IN Equal proportion  
Direct in form of BNB

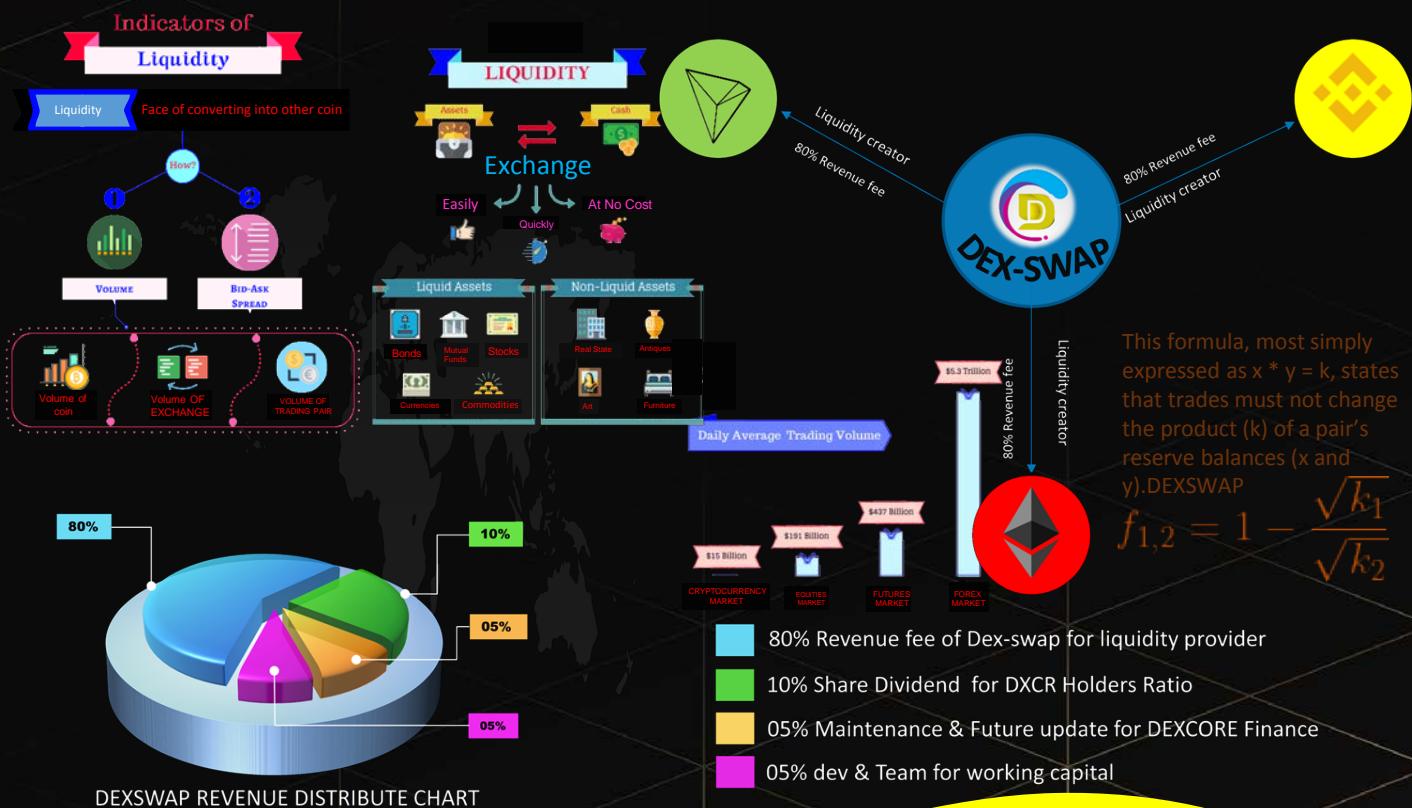

## LIQUIDITY DEFINITION

**Work functionality for liquidity provider:** Liquidity provider can earn 80% revenue fee of DEXSWAP who add a liquidity of ETH/DXCR pools then will get 80% of all DXCR swap fee reward in equal ratio.

**EXAMPLE:** If user hold 1% DXCR pool of total DXCR pool

then will get 1% reward weekly direct in form of ETH from 80% of all DXCR pools swap fee in revenue.

## WHAT IS CORE-SURE

CORE=DEXCORE.....

SURE=SURITY WITH SECURITY OF LIFE.....

In the present scenario blockchain users are facing very vast problems like if any user missed it private key or lost it so his fund lost forever and no way to recover , apart from this maximum users hold their fund on many crypto exchanges (especially centralize exchanges) so if exchanges hacked by hackers or others all the fund lost which is seen probably every year scenario that is big issue. And users also lost their all fund after accidental death .

Core-sure can solve this biggest problem !

## **HOW TO SECURE BENIFIT WITH CORE-SURE**

Core-sure can solve this biggest problem by returning maximum fund on your maturity that is the best part of our fabulous project. Basically core-sure provides security of your holding fund like in insurance policy ,who buy our policy with their fund and invest with our project, core-sure guarantee 210% (APY ) maturity , if ongoing policy investor accidentally died within 2 months then core-sure return 1000% amount in one time settlement of policy to its nominee . if not claimed by nominee within one month ,core-sure will take responsibly instant action after verification the maturity fund will be delivered to responsible family member/nominee of the proposer with full security of fund

### **HOW DOES CORE-SURE WORK?**

Buy our premium policy and get maximum return of your investing fund with 10x insurance cover maturity ultimate benefit with our core security

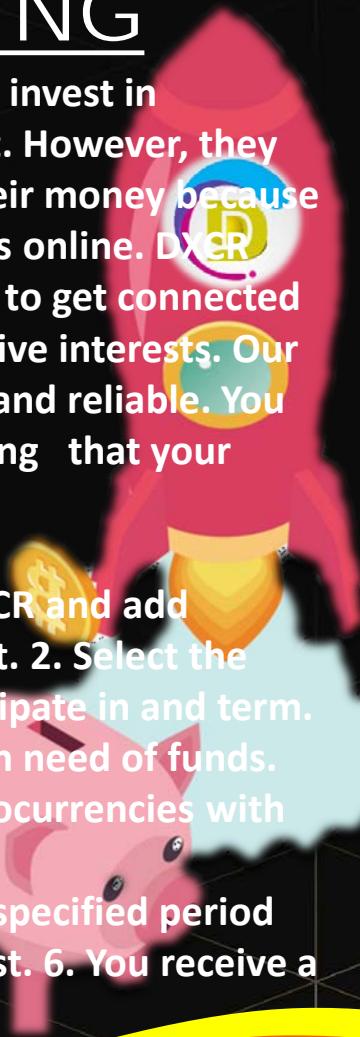

## LENDING

Many individuals have some funds to invest in legitimate businesses to earn interest. However, they are very confused where to invest their money because of the several cases of financial frauds online. DXCR offers such investors the opportunity to get connected with borrowers and earn some lucrative interests. Our system is transparent, highly secure and reliable. You can easily invest with serenity, knowing that your money is in safe hands.

Steps to get lending profit:

1. Create a personal account with DXCR and add CRYPTO into your investment account.
2. Select the kind of investment you wish to participate in and term.
3. We connect the borrower, who is in need of funds.
4. The borrower deposits some cryptocurrencies with us.
5. The borrower takes this loan for a specified period and then pays back with some interest.
6. You receive a smart interest of profit

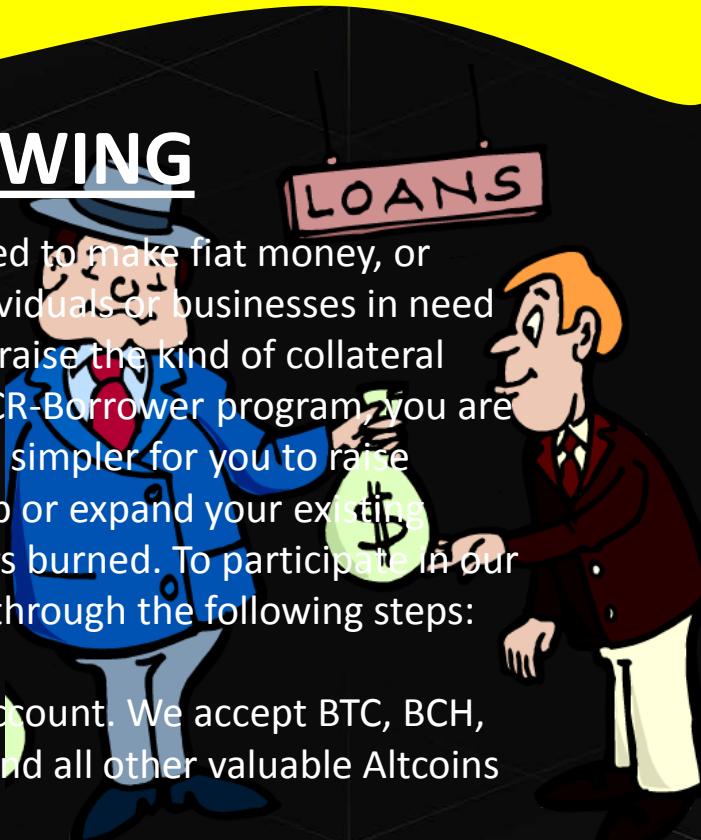

## BORROWING

DXCR- borrowing program is designed to make fiat money, or some crypto funds available for individuals or businesses in need of such but are getting it difficult to raise the kind of collateral required by the banks. With the DXCR-Borrower program, you are easily covered. Therefore, it is made simpler for you to raise SMART funds for your dream startup or expand your existing business without getting your fingers burned. To participate in our borrowing scheme, you need to go through the following steps:

1. Open an account with DEXCORE.
2. Add your crypto assets into the account. We accept BTC, BCH, ETH, LTC, XRP, LINK, BNB, XLM, TRX and all other valuable Altcoins which are added frequently.
3. Go to your profile and verify your Identity (KYC-process)
4. Click to “Withdraw Credit” where the available loan is displayed.
5. Select the withdrawal method you prefer and input your bank account if you are taking the loan in fiat currency. However, you should input the wallet address if you are taking the loan in USDC (USD Coin) / USDT (Tether)

## NON-FUNGIBLE TOKENS (NFT)

NFT, popularly known as Non-Fungible Tokens, are hosted on the Blockchain of Ethereum. NFTs are digital articles that are distinctive, and examples include collectibles or game articles or artworks. Others include domain names, crypto collectibles, a real-world assets, an event ticket, etc. Tokenizing your artwork as an artist, for instance, gives it that distinctiveness and enables you to place a stamp on it as your personal creativity. The real ownership of the work is managed on the blockchain. On this network, users can easily create as many collectibles as they wish, sell them or decide not to sell. You also have the right to reduce the price at any you wish, without incurring transaction fees. Once you sign the request for signature through your wallet, the change is effected

Our TEAM is working on NFT PROJECT & we will launch soon.....

we will also help and make you learn how to create new NFT using our platform with many kind of innovative featured.

And will provide Guide how to buy-sell NFT on NFT MARKETPLACE with earn more in future..

## DEXCORE GOVERNANCE

DEXCORE provides very transparent & 100% community driven governance for the community & by the community .DXCR desires to grow into a completely decentralized Autonomous Organization (DAO), enriching power to the platform users to make decisions concerning how the system should be governed. When the power of decision is vested in the hands of the creators and collectors, everyone's voice counts, and this translates to a better platform in terms of upgrades. The direct participation of the users ensures a system that is accountable to its community members.

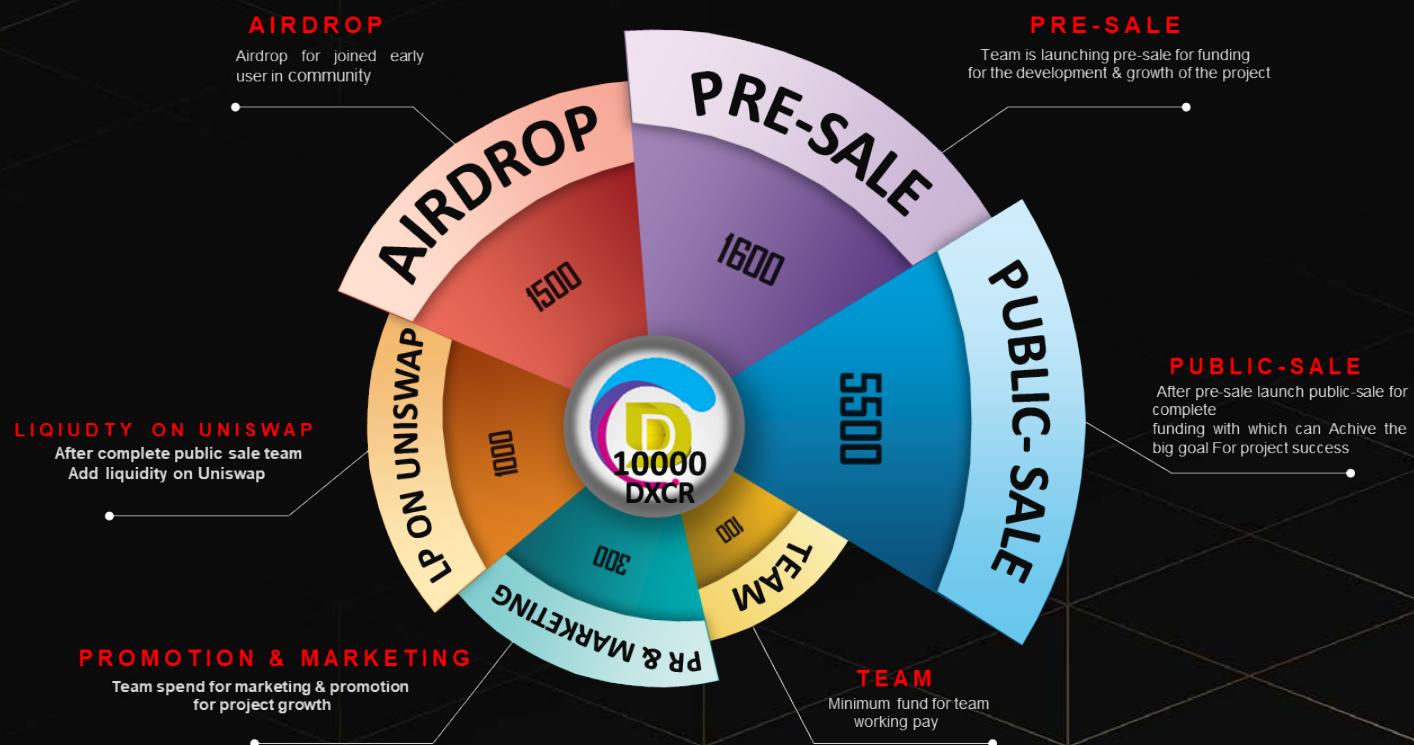

DEXCORE is designed for great community governance. The community decides everything, from developer fees to deciding on the fee approver contract, adding new pools, rebalancing, and even disabling pools in the DEXCORE Transfer contract. Initially, DEXCORE will launch with a 1% fee on transfers for farming, with 7% of that being used as a dev fee. The remaining 93% goes directly to farmers.

# TOKONOMICS

**TOTAL SUPPLY : 10000 DXCR**

## ROAD-MAP 1.0
